No.	2026-11-10 15:45 - 17:00 | 3F Tayouan D
0901 Thermosphere, Ionosphere, and Magnetosphere Dynamics and Interactions	
A0015	Comparative of BDS TEC and GPS TEC from Three Stations in Thailand Jianfeng Zhang, **Prasert Kenpankho**
A0027	Ionospheric TEC Consistency between Thailand and Philippines from Paired GPS Observations Samatchaya Maichuen, **Prasert Kenpankho**
A0033	Assessment of Total Particulate Matter Using iTEC over Low Latitude Thailand Wanwisa Mantonghlang**, Pattawut Wongsak**
A0038	Measurement of Atmospheric Particulate Matter Using Single Frequency GPS Data Wanwisa Mantonghlang, **Prasert Kenpankho**
A0049	Compact Long-Wave Infrared Optical Lens Design for Monitoring the Signal of the El Niño-Related Phenomena **Sheng-feng Lin**
A0057	The Study of Estimation of Ionospheric Layer Height Using Total Electron Content Krittanai Boonnoy, **Prasert Kenpankho**
A0084	Assessing Upper Atmospheric Ozone and Aerosol Anomaly Responses to Major Solar Flare Events Using Cloud-Based Sentinel-5P Data Carlos Jose Dinero Rivera, **Rosanna Dureza**
A0037	Analysis of Thermospheric Neutral Winds and Composition Changes during the May 2024 Geomagnetic Storm using GITM **Li-Yan Chang**
0902 Monitoring and Simulation of Solar Activity and Space Radiation	
A0022	Evaluating High-Latitude Electric Potential Models in TIEGCM 3.0 against COSMIC-2 Radio Occultation Observations during the May 2024 Gannon Superstorm Le-ping Jhang, **(Cissi) Ying-tsen Lin**
A0069	The Role of Magnetic Nonpotentiality and Coronal Magnetic Confinement in CME Speed **Ting-Hsuan Hung**
A0075	Characterizing Quasi-Periodic Pulsations in the Hard X-ray Emission of Solar Flare by SolO/STIX **Chen-Chun Wei**
A0076	Analysis of Type III Solar Radio Bursts by the e-CALLISTO Taiwan-NCU Station **Jiao-Li Huang**
A0079	DEM Plasma Diagnostics of Trans-Equatorial Coronal Holes and Their Long-Term Evolution **Ren-You Guo**

0903 Connecting the Local Observation to Global Network and Space Weather Services	
A0014	Effects of Probe Spacing and Plasma-Flow Direction on Current Collection in a Multi-Needle Langmuir Probe Array Yi-Qiao Li, **Chun-Sung Jao**
A0087	Development of a Self-Powered Standalone GNSS Receiving Station **Chao-Yen Chen**
0904 Space Weather Awareness and Public Outreach	
A0077	Ionospheric Disturbance Monitoring and Risk Zone Identification for GNSS Users Based on Artificial Intelligence Thitsanapat Siwarattanan, **Jirapoom Budtho**
A0080	Elementary Students' Perceptions of Space Weather: A Thematic Analysis of Drawings in the Philippines Giovanni Paolo Mondejar**, Dave Loui Arandillo Gumarang**
0905 AI and New Techniques of Space Weather Forecasting	
A0025	Applications of Combinatorics Analysis for Characterizing the Day-to-day Variability in Equatorial Spread-F, Equatorial Plasma Bubbles, and Low-latitude Scintillation Occurrence **Rezy Pradipta**
A0032	LSTM-Based Prediction of Sporadic-E Critical Frequency (foEs) Compared with Observations from Chiang Mai Station, Thailand Sakkrapop Khuangsatung, **Noraset Wichaipanich**
A0043	Performance Evaluation of Deep Learning Classification of Plasma Bubble Occurrence in All Sky Imager Using GNSS ROTI Observations **Jheng-Syun Chao**
A0056	U-Net-Based Denoising and Data Augmentation for Automated Spread-F Classification in FMCW Ionogram Images Phongsachot Benchawattananon**, Anan Kruesubthaworn**
0906 CGMS Efforts to Improve User Access to Operational Space Weather Data	
A0041	A High-Performance and Automated Data Processing Framework for FORMOSAT-9A Radio Occultation and Reflectometry Mission **Hsu-Hui Ho**
0907 General Topics on Space Weather	
A0029	Equatorial plasma bubble occurrence over Manila based on pre-reversal enhancement, neutral winds, and equatorial electrojet Lalaine Anne Escupete Asares, **Ashley Jhane Budduan**
A0046	In-situ Ionospheric Observations from the PEARL-1C CubeSat **Wei-Rong Huang**
A0060	Equatorial Plasma Bubble Observations Using Airglow and Radio Occultation Measurements **Shih-Ping Chen**

A0062	Lunar Gravitational Modulation of Ionospheric F2-Layer Height and Equatorial Ionization Anomaly **Tsung-Yu Wu**
A0063	GPS TEC and HF Doppler Observations of Traveling Ionospheric Disturbances Generated by Typhoon Chanthu Pei-Cheng Chen, **Yao-Chun Chen**
A0074	FORMOSAT satellite observations of large-scale and transient ionospheric plasma structures at low and middle latitudes **Fu-Yuan Chang**
A0081	Numerical Modeling of Electromagnetic Shielding Evaluation of Pineapple Leaf Fiber-Based Material for Extravehicular Space Suit **Dave Loui Arandillo Gumarang**
A0082	Numerical Modeling of Space Weather-Induced Radiation Effects on Titanium Brake Drum Heat Behavior for Lunar Mobility Systems **Dave Loui Arandillo Gumarang**
0908 Space Weather Impact and Mitigation	
A0047	Equatorial Ionospheric Plasma Bubble Drift Velocity Estimation Over Low-Latitude Indian GNSS Stations **Supraja Reddy Ammana**
A0083	Global Assessment of Low Latitude Ionospheric Scintillation Artifacts in C Band Synthetic Aperture Radar During the May 2024 Geomagnetic Storm Carlos Jose Dinero Rivera, **Rosanna Dureza**
